

Bista Solutions'

ODOO PROMO INDUSTRY SUITE

The Perfect ERP Solution for the Promotional Products Industry

With over two decades of ERP experience, the Bista team strives to offer solutions that can unify and ease all your business processes, regardless of the industry you are in. The promo industry has many moving parts that need to work cohesively to provide optimal results.

Our Odoo customization for promotional products ERP software provides an integrated workflow that simplifies tracking and sharing activities. Even if you are currently using a custom-built web store or front-end software, we can seamlessly integrate a strong back-end software with any platform that you are using. These promotional products ERP tools can help in drastically increasing order fulfillment rates and ensuring customer satisfaction.

Bista Solutions' Odoo and ASI integration offers businesses in the promotional products industry the tools they need for success, including being able to find products via the product category or prices. As one of the industry's leading product research tools, ASI has become a valuable resource for both suppliers and distributors of promotional products.

Bista Solutions' Odoo and PromoStandards integration allows promo industry suppliers and distributors to connect as well as interact and leverage data. Distributors can search for and retrieve information related to inventory availability, product data as well as enabling transactional integration for sending POs, getting status and tracking as well as invoices from within Odoo.
